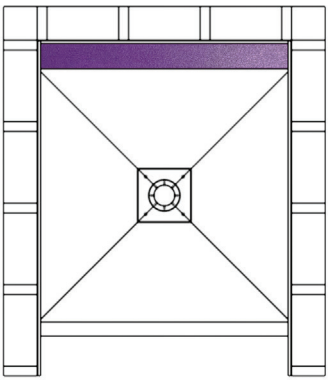
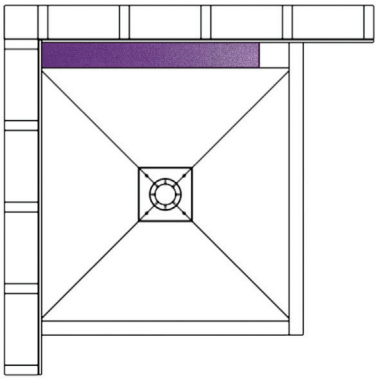
Couldn't be more simple...

wall-to-wall application



wall-to-screen application



Insitu® Shower Shelf is the easiest way to add a modern and practical touch to your bathroom. Plus, by choosing Shower Shelf you won't need to build a shelf into the framework, saving you time and money.

Manufactured from the same material as Insitu® shower bases, it possesses all of the same trademark characteristics. This means Shower Shelf is lightweight, features thermal and acoustic insulation properties and is completely impervious to water (waterproofing with a suitable membrane is still required).

Shower Shelf has been specifically designed to work with Insitu® shower bases and can be ordered together in kits. Shower Shelf suits both two-wall and three-wall applications, with most orders custom made to measure.

- Factory applied protective coat of Cureflex® SLR2000.
- Installation process is incredibly quick and simple.
- In-built falls on the top surface makes tiling easy.
- Solid construction guarantees strength and rigidity.
- Proudly designed and manufactured in Australia.
- Machined from industry approved materials.
