

2PART PCM-17 Polymer Cementitious Membrane

Cureflex - 2PART PCM-17 is a fast drying "2PART" waterproof membrane that is suitable for a wide range of waterproofing applications. It consists of Part A (liquid) and Part B (dry powder).

Cureflex - 2PART PCM-17 uses a new technique in "Cross-Collateralisation" in (PPT) Powdered Polymer Technology, provides outstanding adhesion properties over a variety of building substrates such as; concrete, masonry, Hebel panels, renders, compressed sheeting, cement sheet underlays, villa board, cement based compounds and all grade plaster board. Cureflex - 2PART PCM-17 also offers excellent surface adhesion properties for typical overlaid finishes such as screeds, renders and tile adhesives.

Cureflex - 2PART PCM-17 meets the AS Requirements of:

- AS/NZS 4858:2004 Wet Area Membranes as a Class II membrane
- AS3740: 2004 Waterproofing of Wet Areas Within Residential Buildings

Product Features

- Will not re-emulsify. Engineered to withstand ponding & permanent wet conditions
- Non hazardous, Solvent free & odour free (VOC level <47ppm)
- Provides exceptional Flexibility & Elongation properties
- Excellent "non-sagging" properties over vertical & horizontal substrates during application
- Compatible with: tile adhesives, screeds & masonry renders
- Suitable for Internal / external applications

Typical Applications

- Wet areas and shower alcoves
- Terraces, Balconies, Porches, Patios, Podiums and deck areas
- Swimming pools, Water features, and fish ponds
- Facades, retaining walls and planter boxes
- Water tanks and general water storage areas
