

HV124 Silane Construction Adhesive

Cureflex HV-124 (High Viscosity) Silane Adhesive is a Premium Grade - Solvent Free adhesive designed for bonding porous and non porous products/materials on vertical or horizontal substrates. This High Performance adhesive is specifically engineered to provide instant “grab” adhesion between product surfaces and substrates offering exceptional fast curing properties without shrinkage, odours or vapours.

Cureflex HV-124 Silane adhesive has excellent Elastic bonding properties which offers hi-adhesion from rigid products or substrates such as concrete & metals to flexible items such as PVC plastics and rubber. Cureflex HV-124 Silane adhesive is 100% UV stabilised designed to withstand extreme conditions and can be applied over painted surfaces & waterproof membranes. It's applications extends throughout the commercial - industrial Building & Construction, Marine and Automotive Industries.

Typical Areas of Use

- Metals
- Glass
- Timber
- Fibrous Sheeting
- Concrete
- Acoustic Underlay
- Plastics
- Rubber & Cork
- Vinyl
- Laminex
- Paints
- Ceramics
- Polystyrene
- Array of products, material non porous & porous

Features & Benefits

- Solvent Free
- Non Flammable
- Free of Hazardous Odours
- One Part Hassel Free Application
- Fast Drying (24 hour curing)
- Hi Water Resistance
- No Grinding or Etching Surfaces Required
- 1m² per 1kg approximate coverage
- Excellent Acoustic Deadening Properties
- Free of Isocyanates & Halogens

Available: 15kg Drum - 720gm Foil Pack - 330gm Cartridge

Cureflex HV-124 Silane adhesive is applied using 2-5mm notched trowel or Caulking Gun.

Cureflex HV-124 Silane Adhesive has been field & laboratory tested to ensure it satisfies and exceeds industry requirements.

We Guarantee you'll never go back to the old ways again
