

## LS151 Primer Resurfacing Primer

Cureflex LS-151 Resurfacing Primer is a new generation of high adhesion primer solutions specifically engineered to radically improve non porous surfaces and substrates such as:

### Metals

Stainless Steel – Brass – Copper – Galvanised  
Iron – Zincalume - most metals

### Polished

Porcelain – Stone Tiles & Panels – Solid  
Timber Boards & Panels Sealed or lacquered

### Glazed

Hi-Gloss Ceramic Tiles – Glass Bench Tops –  
Glass Splash Backs – Sealed Surfaces

### Extremely Dense Surfaces

General non porous and shiny surfaces – PVC &  
ABS Plastics – Vinyl - Paint - Laminex - Epoxy &  
Polyurethane Finishes – Waterproof Membranes

Cureflex LS-151 Resurfacing Primer provides a hi-strength film over non porous surfaces creating an excellent new surface that allows Tiling, Rendering, and other construction materials to adhere to without the aid of expensive, hazardous epoxy/polyurethane adhesives. It provides a quick, cost effective alternative solution.

### Features

- Solvent Free
- Non Flammable
- Hi Water Resistance
- Fast Drying (15-30 mins)
- Free of Hazardous Odours
- One Part Hassel Free Application
- Available in 1.2lt – 5lt – 15lt Drums
- 1lt/10-12m2 approximate coverage
- No Grinding or Etching Surfaces Required
- Creates New Surface for Stable Adhesion Performance

Cureflex LS-151 Resurfacing Primer has been field & laboratory tested to ensure it satisfies and exceeds industry requirements.

*Cureflex LS-151 Resurfacing Primer can be applied using brush or roller over clean surfaces.*

Australian Made, Designed and Protected.
