

Tile Trims Anodised Weep Hole Design

In thinking about wet areas, we've drilled down into every detail, looking for ways to create innovative solutions. Our Tile Trims are an excellent example of how we combine aesthetics, practicality and problem-prevention. These are the world's first anodised tile trims, that provide both a stylish metal trim finish for tile edges, and incorporate a unique **Weep Hole design** which enables any water trapped under tiles to flow through the trim creating a perfect drainage point.

Features

- No trapped water causing adhesives to re-emulsify
- No growth of mould and bacteria under the tiles
- No build up of water which can create leaks
- Eradicates the common issue of water pooling under tiled shower bases & balconies
- Will not wear, chip, crack, distort or tarnish
- Stylised Bevelled edge for superior finish
- Suited for elongated linear water channel drains, shower & balcony hobs
- Available in multiple heights
- Anodised Coating
- Non Corrosive

Available in 3m lengths
Bevelled Trim heights:
8mm / 10mm / 12.5mm
