EASY TO INSTALL & READY TO RENDER

# FAÇADE COLUMNS

## EASY TO INSTALL & READY TO RENDER

- Ultra light-weight, high-density polyurethane core, provides impact resistance and thermal insulation.
- Precision machined into two halves that enclose a central structural beam (depending on frame design).
- Suitable for use with timber or steel house frames.
- Simple, time-saving 15 minute installation process with inter-locking groove system for perfect alignment.
- Sealed with Cureflex® SLR2000 for added protection.
- Suitable for rendering, tiling, painting, stacked stone, wall cladding and more (use with appropriate primer).
- Additional panels can be joined together to create taller or wider custom-size façade columns.
- Decorative cappings, skirtings and kickers available.
