Truly timeless...

Nero™ Designer Drain II is unlike any other modern shower base drain. It strikes a balance between style and functionality without compromise.

Designer Drain II is multi-functional and versatile. With an integrated puddle flange, there are less components to install, reducing the chance of water leaks. The included insert lid is tiled along with the shower base itself for a minimal and seamless effect, perfectly matching the bathroom of your dreams.

Designer Drain II has been engineered to work with Insitu™ Shower Bases and can be ordered together in standard size kits or custom made to measure. Insitu™ Panelling Systems can also be specified with Designer Drain II.

- Available in grey or black to suit any bathroom.
- Can be fitted to both new and existing showers.
- Easy access insert lid makes cleaning a breeze.
- Accommodates 80/90/100mm pipes all in one.
- Proudly designed and manufactured in Australia.
- Moulded from industry approved plastics.
- When paired with a reducer, it also allows a 50mm pipe connection.

This design is registered with IP Australia (no. 202014769).
